MATHS ACTIVITY

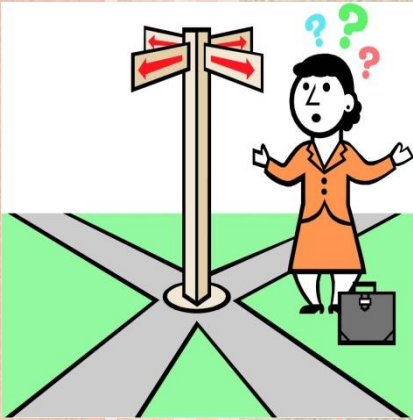

To understand the use of money in real life children read the price tags of different products and prepared a bill.

Also they compared the prices of different commodities and identified which one was costlier.

Both these activities helped children to practice the concept of addition and subtraction of money.

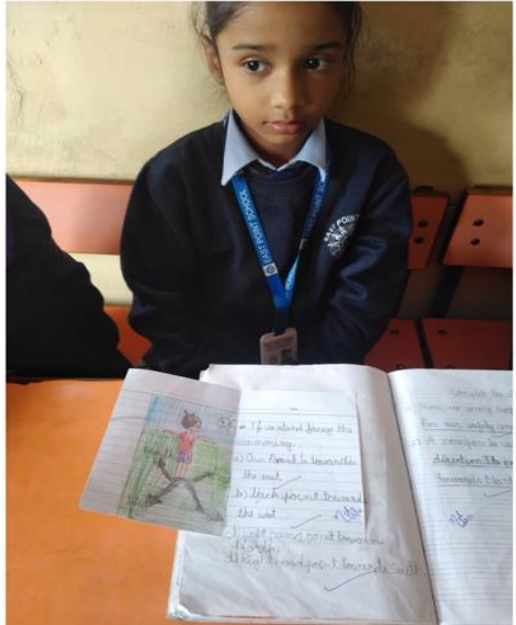

Lets Learn about Directions

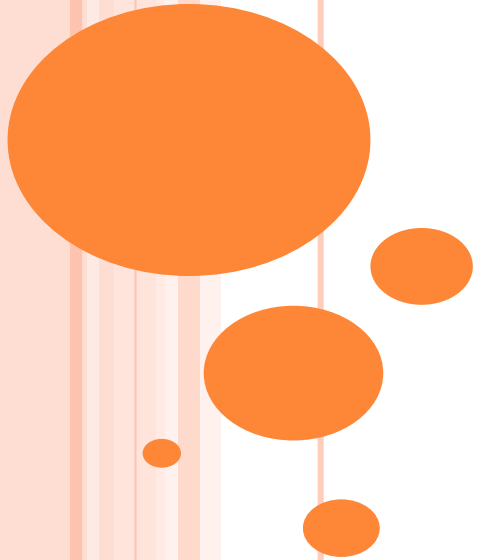

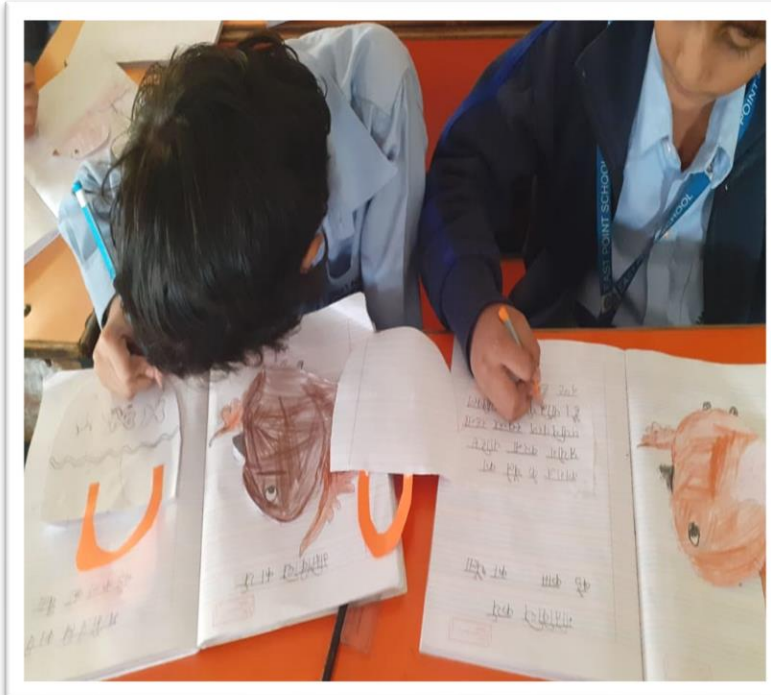

Four main directions were explained to the students by using compass. After that students were taken out in the field to explain the directions by showing the position of the Sun.

गतिविधि कार्य

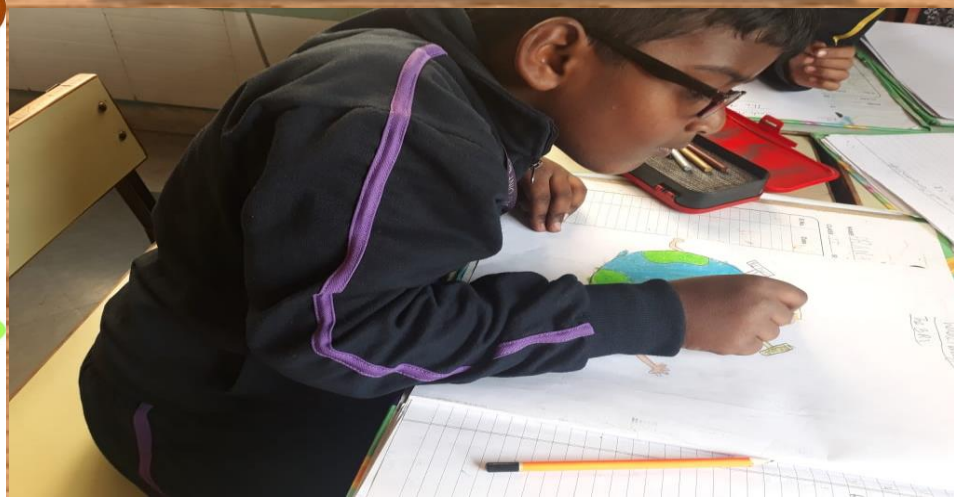

पॉलिथीन की थैलियाँ पर्यावरण के लिए हानिकारक हैं। इस विषय से संबंधित छात्रों ने कागज के थैले को बनाकर उसके उपयोग के बारे में लेख लिखा।

Let's use the right dustbin

Students of class 2 were made aware about segregation of biodegradable and non-biodegradable waste. They were shown a video about 3 R's (Reduce, Recycle and Reuse) and after that poster making activity was done in the class.

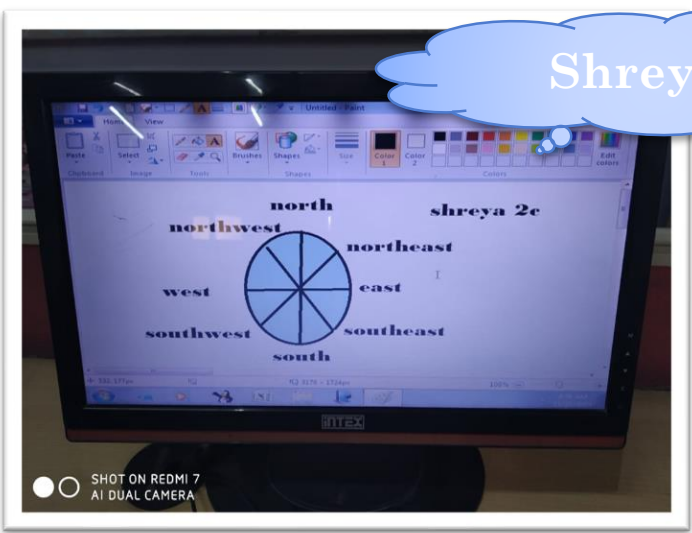

Story Board Activity (Amazing Animals)

Different cut outs of animals were pasted on the Story Board. Students were asked to form a short story under the title “Amazing Animals”. This activity helped them to enhance their creative writing skills.

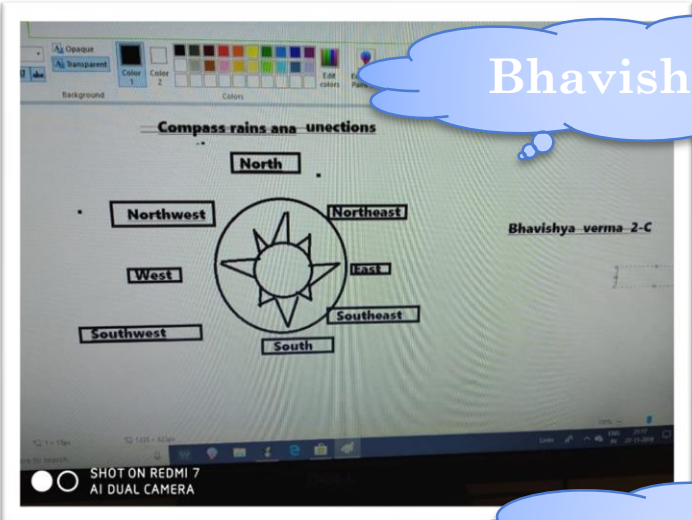

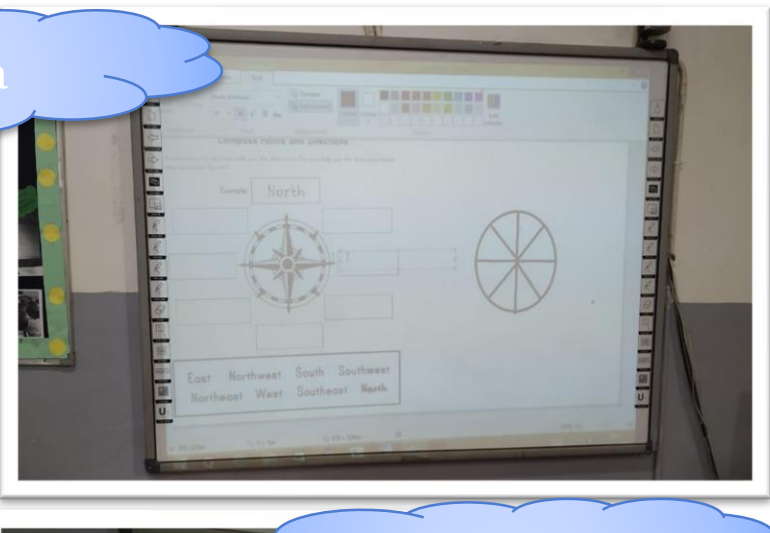

Students drew the "Directions" and "Kutch House & Pucca House" using different tools in MS-Paint.
