## AI For Better India Project

Aarohi of XIIB was the team member for presenting AI ENABLED SEWA PROJECT . Ms. Joyeeta Das, head of IBM, welcomed the panellists and the attendees, and talked of the programme AI for Better India hackathon by One Million for One Billion, organised by IBM in collaboration with CBSE, under the SEWA programme. She shared that "The programme made me understand, that not always you have to look for a general solution, and expect a one fits all solution. Sometimes we need to think in a limited way, and develop a solution in a specific context, and work our way up in order to achieve the bigger goal."

# VAN MAHOTSAV

On account  
of Van  
Mahotsav  
Day

Aarohi Mehta

## A Wish

By: Aarohi Tyagi

XII D

You have built a wall around,  
Stopping the daylight: suffocating in a  
shroud.  
Lamenting over the lost sky unbound.  
You put your dirt into the running  
water,  
Now why do you pity about the potable  
water?  
You smoked your way through roads,  
corridors and passages,  
Then why you wail about the open  
spaces?  
We keep fulfilling our wishes,  
Without caring if nature nourishes.  
Why don't we wish a sustainable life?

## Flourishing Life

Divya Sharma

XII D

The issues of Global Warming and waste  
disposal are fatal,  
Let's chuck these injuries as they are like pre  
natal.  
To protect our resources is our prime  
responsibility,  
Not exploiting them to fulfill our necessity.  
Replace your car with public transport or a  
bicycle  
The best way is to reduce, reuse and recycle.  
We should stop the use of plastic  
To save the life of biotic.  
We harm our environment through pollution,  
Immediately we should find a solution.  
Soon we will recover from all the sufferings,  
Life on earth will be flourishing.
