Biodiversity

- Biodiversity is a biological variety of species and a healthy relationship between them.
- Every species in the ecosystem has a special function without which the balance of the ecosystem may destroy.
- Biodiversity helps in sustaining the food web in the ecosystem.
- There are around 8.7 million species on earth with 6.5 million on land and 2.2 in oceans.
- Forests host a large amount of biodiversity and protect us from pollution.

Biodiversity provides functioning ecosystems that supply oxygen, clean air and water, pollination of plants, pest control, wastewater treatment and many ecosystem services.

Biodiversity provides humans with raw materials for consumption and production. Many livelihoods, such as those of farmers, fishers and timber workers, are dependent on biodiversity.

We can conserve Biodiversity in the following ways:

1. Nature preserves
2. Habitat restoration
3. Reduce climate change
4. Sustainable living
5. Education

Stakeholder Address

It is believed that "What makes a child gifted and talented may not always be good grades in school, but a different way of looking at the world and learning."

I would like to take this opportunity to thank each and every parent for their continual support in making online learning a beautiful voyage during pandemic phase. At EPS we endeavour to give every learner the chance to express herself/ himself through a judiciously planned curriculum. A newsletter is the replication of the same. Each child has his own exclusive qualities and as instructors it is our accountability to foster and develop every student in their early years of education. The curriculum is often revised to ensure that it remains apt to fulfil the desires of our learners. Our passionate and extremely enthused squad of educators work diligently to ensure the very best opportunities for every child.

PARENTS' MESSAGE

I appreciate the support of East Point School teachers who worked hard to provide education to each child despite of limited resources and new technological environment for all the teachers, students and parents.

Teachers well explain the concepts with the help of online contents to whole class and put their best efforts in present pandemic situation where physical education is not feasible and only online education is the way to move ahead

A Note from the Teacher

Dear Students,

I know that these are extremely challenging times and you are missing school terribly. We too miss you and your smiles and your naughty antics . But remember ,this is temporary. Stay connected with us virtually and keep up your learning . Stay positive , help your parents at home and fill your day with meaningful activities . Transforming this situation is our responsibility. Embrace this family time and stay healthy.
