Science Experiment

The students of class 5 conducted an activity related to solute and solvents. They dissolved different solutes in water to find out whether they are soluble or insoluble. This activity helped them to classify solutes as soluble and insoluble in water.

Science

Demonstration

A demonstration of physical and chemical change was done in the Class.

After the demonstration the children were able to identify and differentiate between these changes.

Mathematics Week

13th May – 17th May
